TECHNOLOGIES FOR SPECTACLE FRAME MANUFACTURING

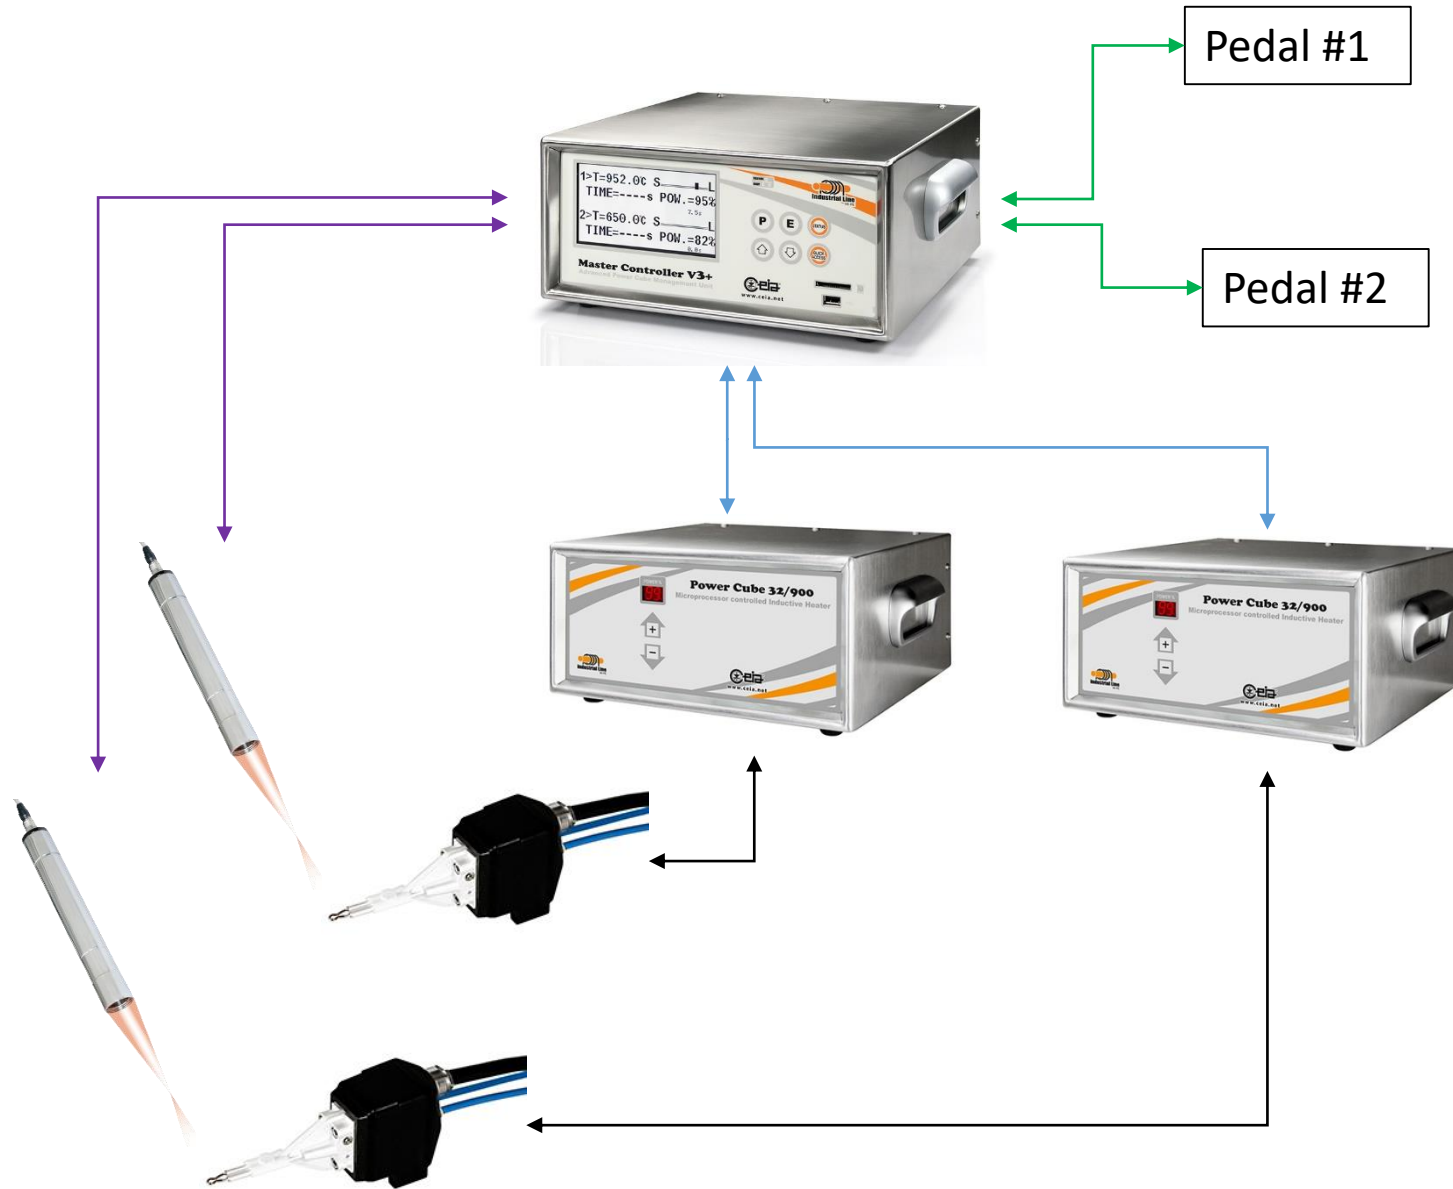

PowerCube Soldering Stations

Modular system explained in 6 different setups.

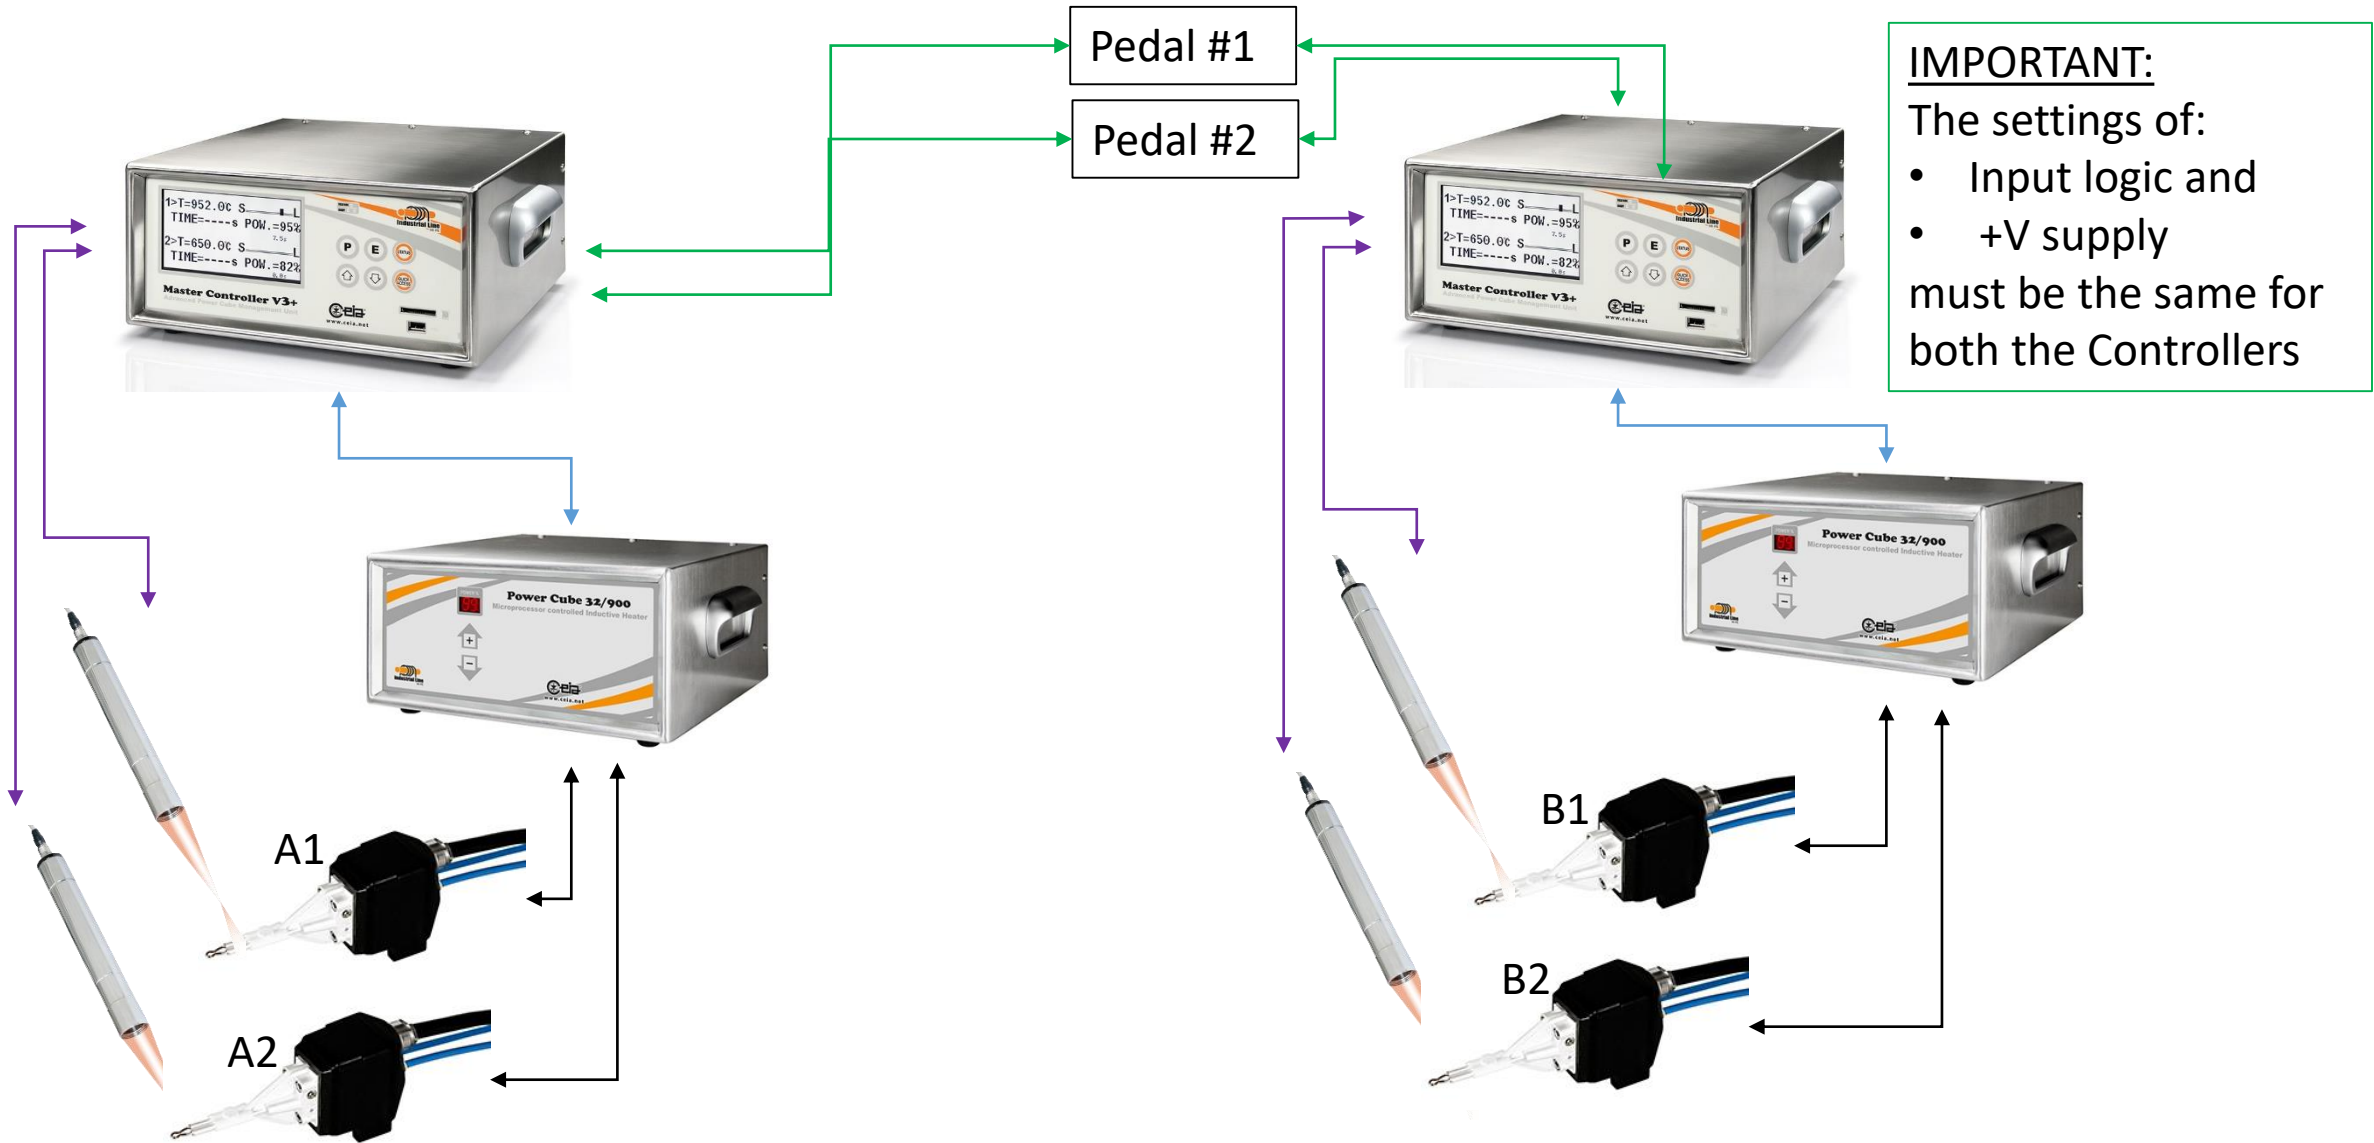

21.11.19

By this set-up, it's possible to activate two heads alternately.

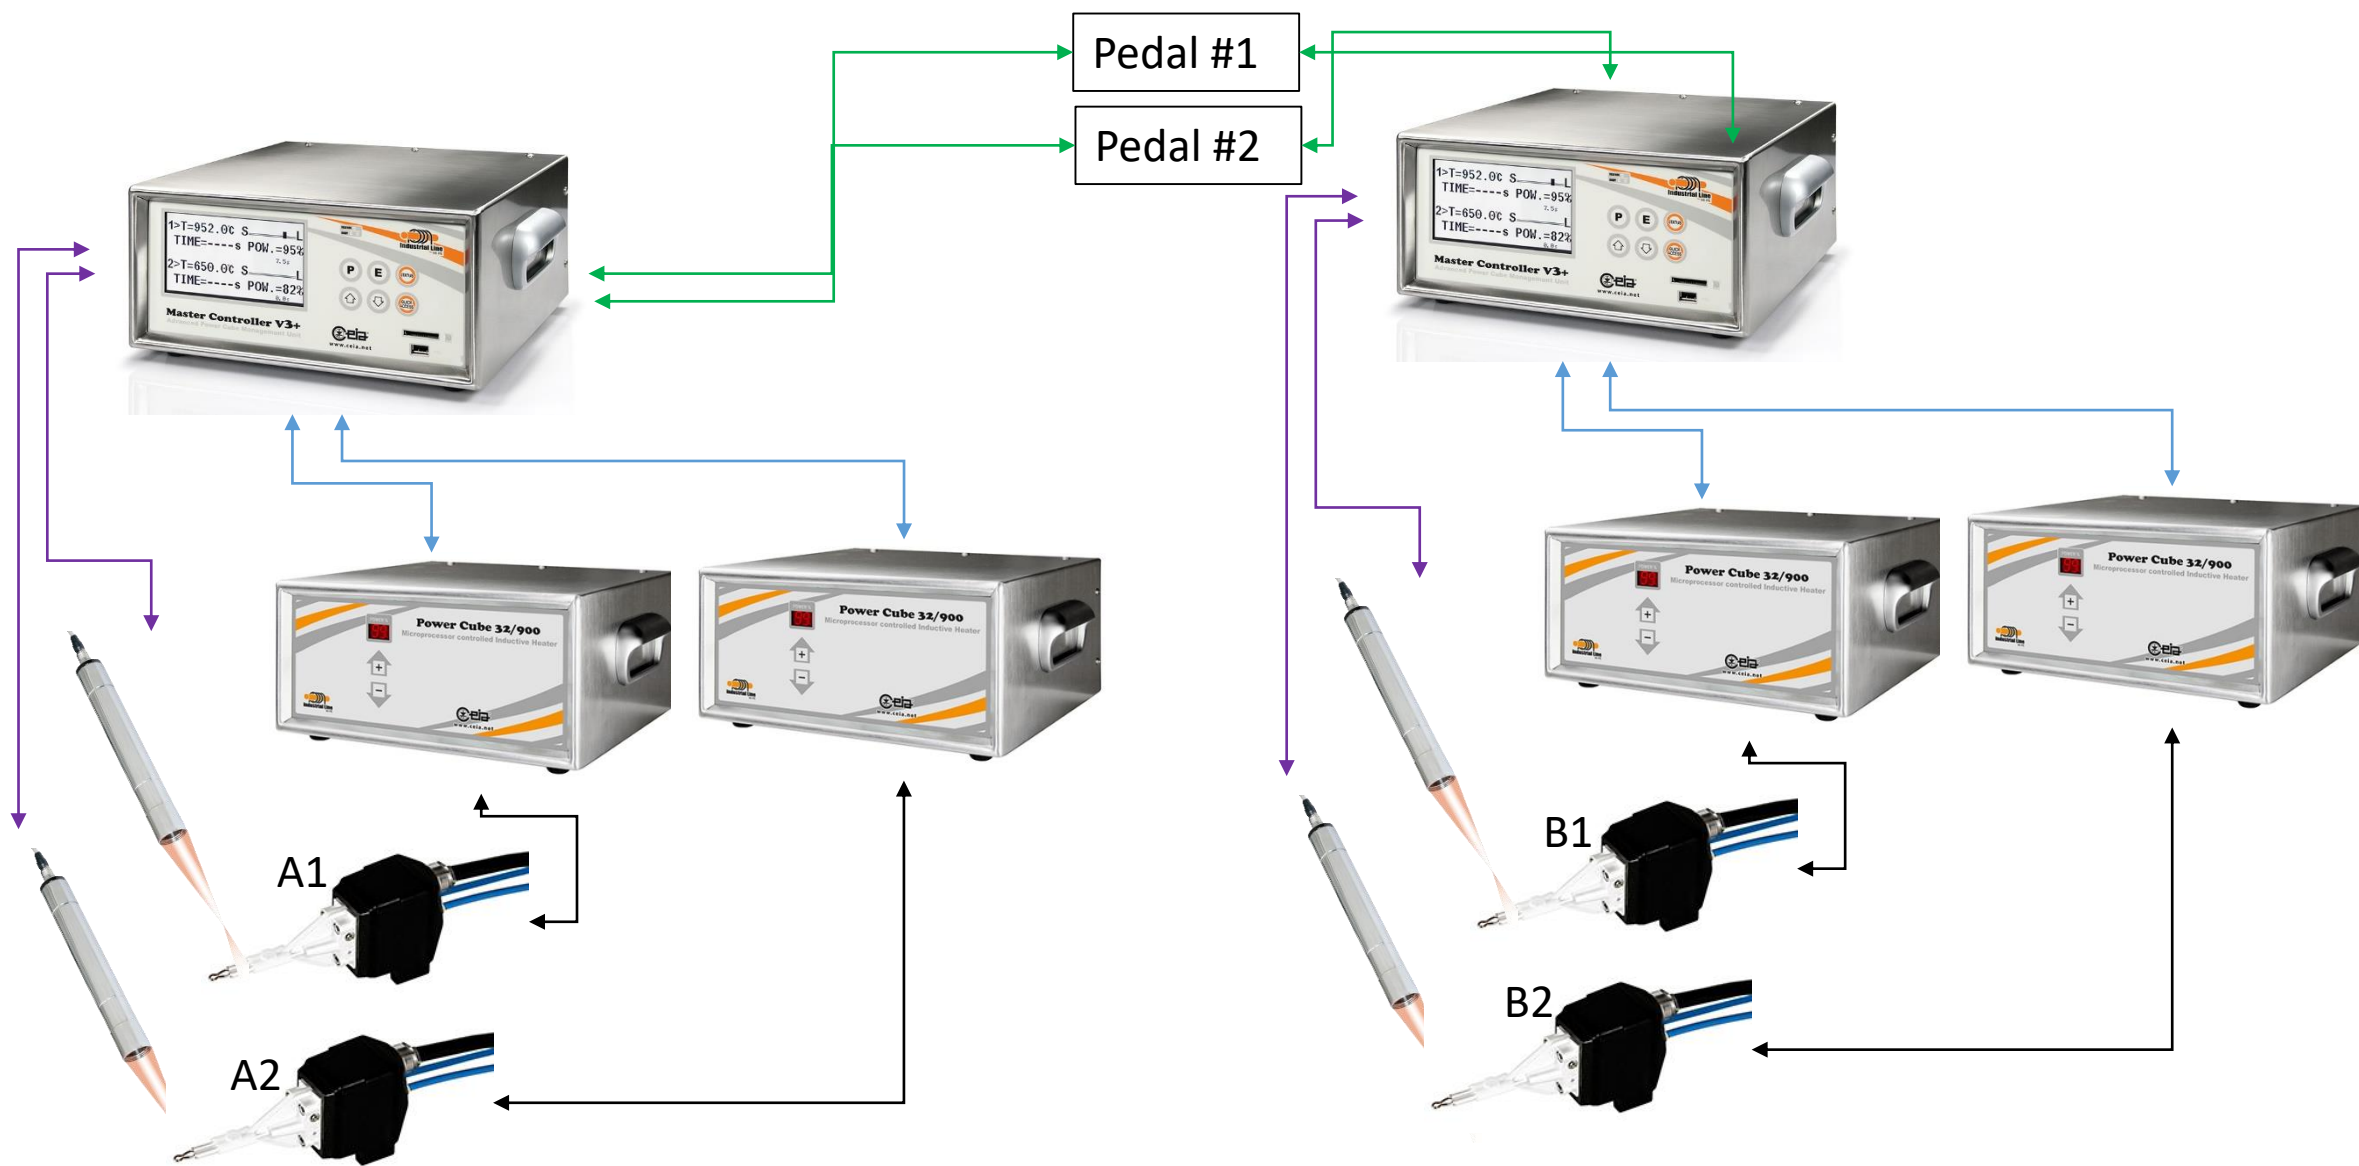

By this set-up, it's possible to activate two heads simultaneously.

IMPORTANT:
The settings of:
• Input logic and
• +V supply
must be the same for
both the Controllers

Pedal #1 activates Heads #A1 and #B1 simultaneously
Pedal #2 activates Heads #A2 and #B2 simultaneously

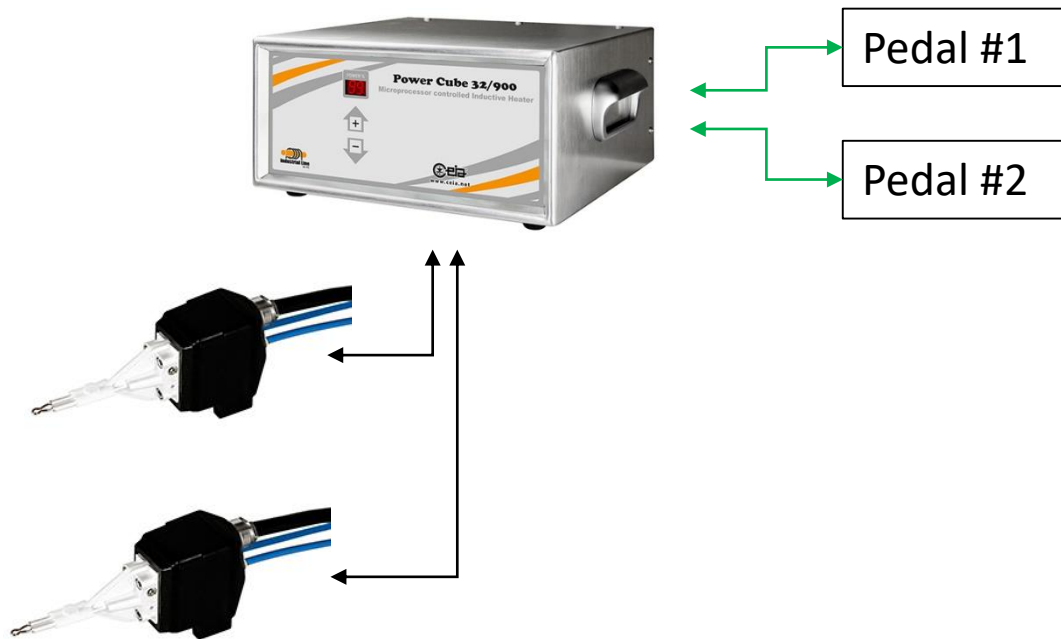

Heads A1 and A2 (and B1 and B2 as well), can be activated only alternately, not at the same time.

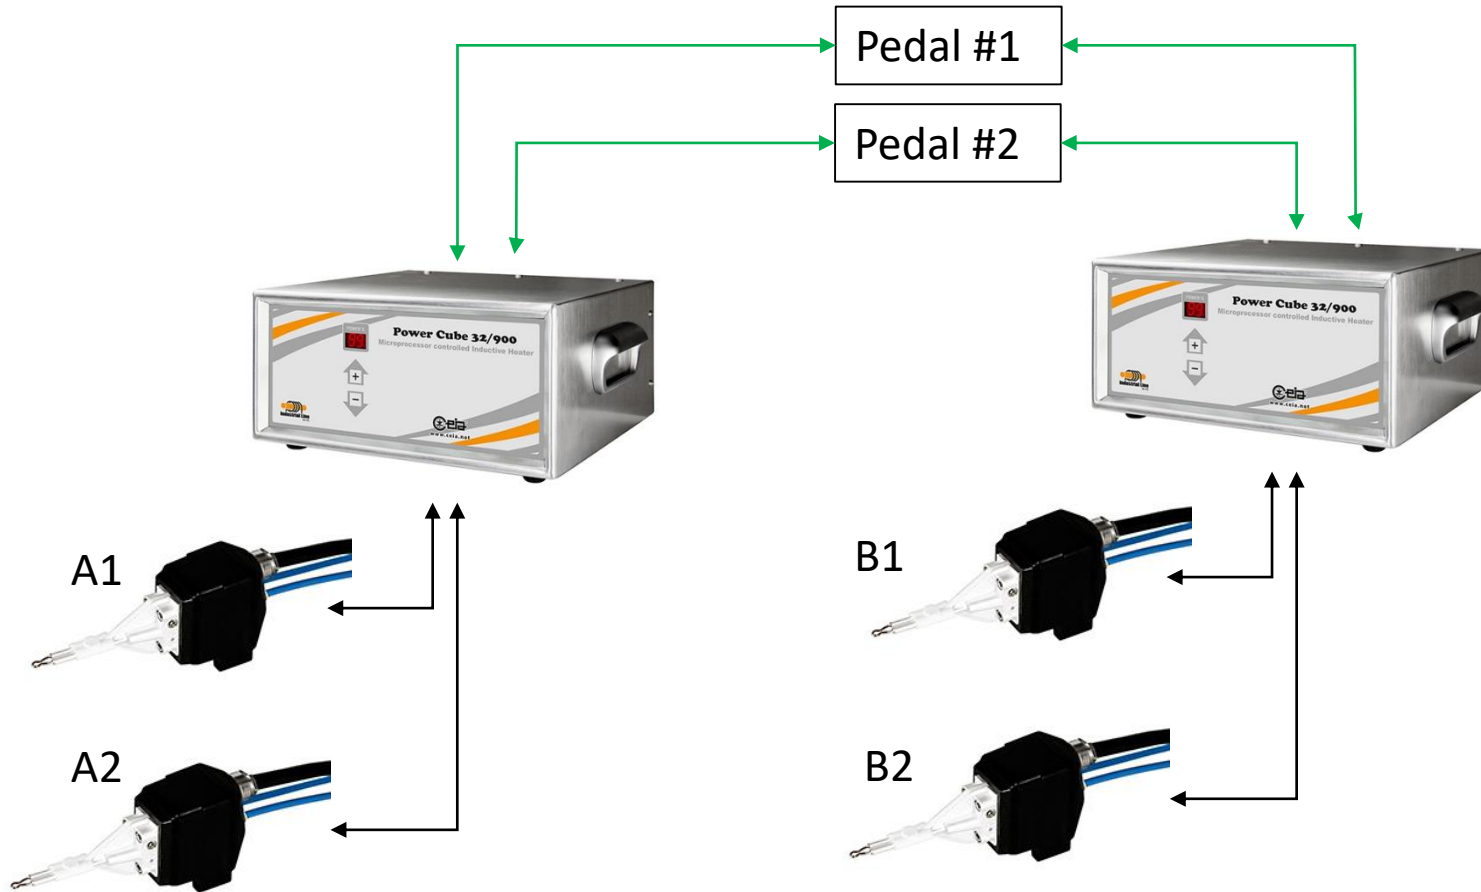

Pedal #1 activates Heads #A1 and #B1 simultaneously
 Pedal #2 activates Heads #A2 and #B2 simultaneously

Heads A1 + A2 and B1 + B2,
 can be activated even simultaneously, at the same time.

By this set-up, it's possible to activate two heads alternately.

By this set-up, it's possible to activate two heads alternately.

Pedal #1 activates Heads #A1 and #B1 simultaneously
Pedal #2 activates Heads #A2 and #B2 simultaneously

Heads A1 and A2 (and B1 and B2 as well), can be activated only alternately, not at the same time.
